

JSP CHOICE 22-20 AM Calf Milk Replacer w/ MOS & Probiotics

Features and Benefits

- Protein level – 22% Fat level – 20%
- Edible grade milk ingredients are used, including skim milk and whey protein concentrate.
- Animal fat and coconut oil are used to form a combination of long and short chain fatty acids which mirror the fatty acid profile of whole milk, resulting in optimal digestibility.
- Fats are incorporated into the milk replacer by both cold processing and spray drying to provide a more even absorption of energy by the calf.
- Chelated trace minerals, organic selenium and mannan oligosaccharides are used for better utilization and absorption of nutrients, plus enhancement of the immune system.
- Acidified and fortified with natural herbal oils to stimulate appetite, promote digestive enzymes and reduce the growth environment for colonization of pathogenic bacteria.
- Contains a blend of living, beneficial probiotic to stimulate the immune system and promote digestive health.

Guaranteed Analysis

Crude Protein, Min.....	22.00%

Phosphorus, Min.....	0.70%
Vitamin A, Min.....	30,000 IU/lb
Vitamin D3, Min.....	5,000 IU/lb
Vitamin E, Min.....	150 IU/lb
Vitamin C, Min.....	150 IU/lb
Total Bacteria Count.....	1.5 Billion Cells/lb

Mixing & Feeding Directions

Feed colostrum (102° F) for first three days. Calves should receive at least 2 qts. of colostrum as soon as possible after birth and another 2 qts. six hours later. Thereafter, feed 2 qts. of colostrum in 12 hour intervals.

Standard Feeding Directions: Feed Indicated Amounts Twice Daily:

Age of calf	Ounces of Milk Replacer	Quarts of Milk Replacer solution*
4-7 Days	(6 oz)	1.5 quarts
2-6 Weeks	(8 oz)	2 quarts

Recommended Feeding Directions: For increased rate of gain and during cold weather conditions, use the following feeding schedule

Age of calf	Ounces of Milk Replacer	Quarts of Milk Replacer solution*	Feedings per day
Week 1	(8 oz)	2	2
Week 2	(10 oz)	2.5	2
Week 3 - 6	(12 oz)	3	2
Week 7 - 8	(12 oz)	3	1

* 2 quarts of milk replacer is 8oz of milk replacer powder mixed with 1.8 quarts of warm water.

Calves that weigh less than 70 lbs. feed about 1/3 less milk replacer and water.

Mixing: For best mixing results start by adding half of the total amount of water needed. USE WARM WATER OF 120-140 DEGREES F. Add the milk replacer and mix into a uniform solution. Add additional cooler water to equal the total amount and final drinking temperature of 102-105 degrees.

Ingredients

Dried Whey, Dried Skim Milk, Dried Whey Protein Concentrate, Dried Milk Protein, Animal and Vegetable Fat (Preserved with BHA), Lecithin, L-Lysine, DL-Methionine, Yeast Extract, Diatomaceous Earth, Vitamin A Acetate, Vitamin D3 Supplement, Vitamin E Supplement, Ascorbic Acid, Choline Chloride, Vitamin B12 Supplement, Menadione Sodium Bisulfite Complex (Source of vitamin K3), Niacin Supplement, Calcium Pantothenate, Pyridoxine Hydrochloride, Riboflavin, Folic Acid, Thiamine Mononitrate, Biotin, Calcium Iodate, Calcium Carbonate, Dicalcium Phosphate, Magnesium Sulfate, Cobalt Sulfate, Copper Sulfate, Ferrous Sulfate, Manganese Sulfate, Zinc Sulfate, Selenium Yeast, Brewers Dried Yeast, Copper Proteinate, Manganese Proteinate, Iron Proteinate, Zinc Proteinate, Citric Acid, Lactobacillus Acidophilus, Bifidobacterium Bifidum, Lactobacillus Lactis, Bacillus Subtilis, Streptococcus Faecium Fermentation Products, Natural and Artificial Flavors
